

# Louvres & Solar Shading

Standard Louvre - controllable -

Type SOL - A- 145

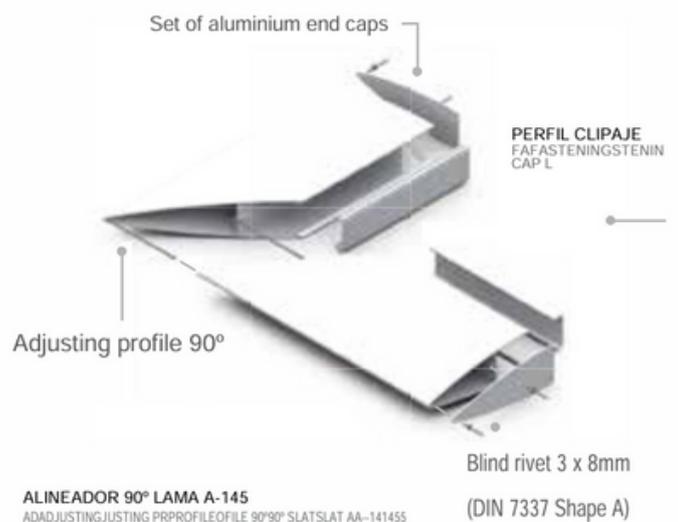

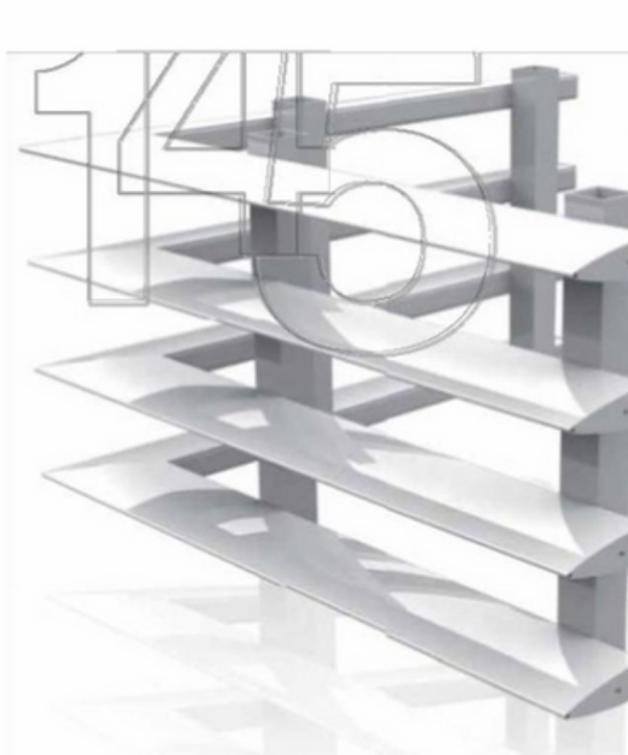

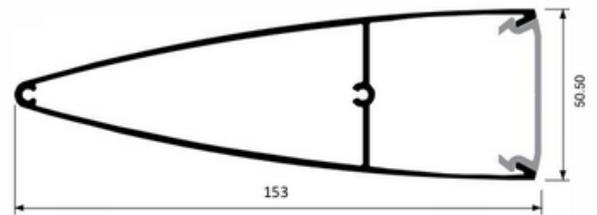

The distance between profiles can be adjusted from 0 mm to the dimension required for the installation or by sunlight protection requirements

## Technical Characteristics

Number of slats by m/l	Weight set (Slat A-145 + Clipping profile)
Depending on project	2.45 kg/m <sup>2</sup>

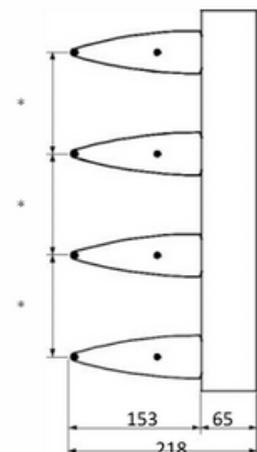

## Technical Drawings

Slat A-145

Extruded aluminium slat that gives proper structural sunlight protection to prevent the glass from overheating since it reduces the amount of sunlight on its surface.
