

This slat has a highly innovative curved form which gives the facade in which it is installed a more attractive appearance.

Technical Drawings

Technical Characteristics

	Material	Number of slats by m/l	Weight
PN*	AL	9	5.16 kg/m ²
PC*	AL	10	5.59 kg/m ²

*PN = 111.11mm. *PC = 100mm.

*Standard gap. Contact us for other possibilities.

The supports are punched equidistantly (allowing various steps) to facilitate the levelled anchoring of the slats without the need for fixing screws. This spacing will depend on the desired degree of coverage and aeration area.
